Not sure if I missed the version update mailers that carried download links in the past for registered users, or the process to download new versions has changed in recent times. But I've not seen any mails from Gabriel for long. I'd like to know which is the latest version of KB Piano available and how I may download the same. The last I have is version 2.5 beta 3 (dated 20-Dec-2011).

Latest version is 2.5 (not beta, but is from Dec 2011). You can send me an email to support@gfsoftware.com so I can send you the download link.
