Hey Gabe, as always the program is simply amazing, it has been a huge help to me in my line of work over the last couple years.

I wanted to bring back a question that I had asked a couple of years ago that I never really followed up with you on. I was wondering if it would be possible for you to update the software to be able to use more than 30 (unique) channels? My orchestra keeps getting bigger and bigger (especially with my longer tracks) and I often find the 30 channel limit a little too restricting.

Obviously, I can find ways to work with it, I just wanted to see if it was possibly a simple thing that you could do with the next update? If not, no problem at all.

Hope you are doing well, and thanks again for all your work on this excellent program.

-Joe

Hi Joe,

Great to know you are making big compositions with KB Piano.  
I'll check it out :) Maybe you'll get an update soon.
